

Dasa GeoInfo

Dasa GeoInfo is an active navigation application developed especially for use in forestry machines taking your productivity to a new level. Dasa GeoInfo supports regional packages in the StanForD format and is used in both harvesters and forwarders. The program displays crucial geographical information about the logging contract as well as boundaries, environmental considerations etc.

Dasa GeoInfo creates a track log on a map to show transport routes and felling. The track log can be transferred to a forwarder and Dasa GeoInfo uses the harvester's production file to display where logs of different varieties of tree are located. The operator can easily create waypoints on the map, e.g. to mark out strip roads or obstacles. Dasa GeoInfo is easy to use and designed to fully support touch screens. All important functions are accessible on the screen via large, distinct buttons.

Key Features

Supports several file formats for maps and coordinate systems
Possible to geo-reference your own map
A harvesting zone can be displayed on both sides of the machine track where the operating range of the crane can be seen.
Displays production from the StanForD Classic file PRI or the StanForD2010 file HPR in the map.
Production in an area can be displayed by selecting any area on the map. Information can be given about volume and number of logs per assortment as well as volume and number per tree species.
Ability to lay out map alarm for e g boundaries or power lines.

Technical Data

Supported file types
Import
SHP, JPG, TIF, TAB, ZIP, GHD, PRI, HPR, Georeferenced PDF

Export
Zip-file including all imported files and SHP-files created in the program

Installation requirements:
Win 7, 8, 10

At Dasa we aim to be a positive force in the change towards sustainability based on a more circular economy.

To be clear about this we defined a symbol to stand for Digitalization, Connectivity and Sustainability, Dasa DCS. We reserve this symbol for products that have taken a significant step towards this mission thanks to these three entities in combination. When the DCS symbol appears on a product, it's a statement saying that this is not just a product, it's part of something bigger.
