

Dasa Forester Office

With Dasa Forester Office you get a flexible and easy to use software for administration of bucking instructions. Dasa Forester Office is developed in close cooperation with Swedish forestry companies such as Södra, Mellanskog, Vida, Norrskog and Derome. Forester Office supports StanForD 2010.

In Dasa Forester Office one can create logging contracts, product instructions and assortment instructions and it's possible to make full use of all controlling parameters available in StanForD 2010. The parameters can be exported to the harvester as individual files or as envelopes.

Creating and editing price lists per individual assortment;
A price list can be created as a row price list, matrix price list or a combination of both. ForesterOffice generates *.PIN or *.APM files which can be used together with the bucking instructions to create the control list for the harvester.

Create and edit bucking instructions for harvesters;
In ForesterOffice one can create logging contracts, product instructions and assortment instructions and it's possible to make full use of all controlling parameters available in StanForD 2010. The parameters can be exported to the harvester as individual files or as envelopes.

At Dasa we aim to be a positive force in the change towards sustainability based on a more circular economy.

To be clear about this we defined a symbol to stand for Digitalization, Connectivity and Sustainability, Dasa DCS. We reserve this symbol for products that have taken a significant step towards this mission thanks to these three entities in combination. When the DCS symbol appears on a product, it's a statement saying that this is not just a product, it's part of something bigger.
