

Dasa H70

Dasa H70 is a user friendly and highly competent bucking software for measuring, controlling, monitoring, and managing the production process. The Dasa H70 software optimizes the value (optimization bucking) of the logs based on a product value list and always cuts the highest value possible. With the Dasa H70 you are guaranteed a high productivity and yield. Dasa H70 has a modern and efficient user interface designed to be operated with the system's touchscreen. Settings and other functions in the system are accessed via the main menu with a logical and intuitive navigation. If the operator needs guidance there is a built-in support function that is accessed via the question mark in the upper right corner. If there is a problem somewhere on the harvester, the visual diagnostic pages give a quick overview so that downtime can be avoided.

The Dasa H70 software is designed according to StanForD 2010. Large numbers of pricelists, logging contract instructions etc. can be fed into the H70 software that processes the information and optimizes the value of the logs. Stakeholders such as sawmills and forestry companies can continuously update pricelists etc. to create optimal value for all parties without causing hassle for the operator.

To combine the strength of the Dasa H70 system, the base machine, and the processing head, it is possible to customize functions and parts of the HMI. To gain more benefits we recommend combining Dasa H70 with other software and services such as Dasa GeoInfo, Dasa Insight, Dasa Sync App and TeamViewer.

Key Features

- StanForD 2010
- Logging contract management
- Visual monitoring via the calendar view
- Visual diagnostics pages
- User friendly
- Built in operator support
- Operator customization (language, authorization level, settings etc).
- Extensive report functions
- Backup system
- Customize functions and HMI
- Fully supports touch screens
- Can be combined with other software products

Technical Data

Installation requirements
Software for PC dOP50C and dOP45C,
Windows 10
Hardware key with valid license

Languages
Available in 16 languages. Swedish and English
is included in the software package.

Import formats
StanForD 2010: spi, pin, oin, env
StanForD Classic: apt

Export formats
StanForD 2010: hpr, hqc, mom
StanForD Classic: prd, pri, ktr
Reports: pdf, xls, txt, pptx

At Dasa we aim to be a positive force in the change towards sustainability based on a more circular economy.

To be clear about this we defined a symbol to stand for Digitalization, Connectivity and Sustainability, Dasa DCS. We reserve this symbol for products that have taken a significant step towards this mission thanks to these three entities in combination. When the DCS symbol appears on a product, it's a statement saying that this is not just a product, it's part of something bigger.
